INDEX TO VOLUME 105

Alphabetical Table of Contents of Authors

ANDERSON, WYATT W. Genetic equilibrium and population growth under density-regulated selection, 489

ANDERSON, WYATT W. See CHARLES E. KING

ARMITAGE, KENNETH B. See JERRY F. DOWNHOWER

ATCHLEY, WILLIAM R. Components of sexual dimorphism in *Chironomus* larvae (Diptera: Chironomidae), 455

ATKIN, NEILS B. See A. W. EBELING

AUCLAIR, ALLAN N., AND F. GLENN GOFF. Diversity relations of upland forests in the western Great Lakes area, 499

BENSON, WOODRUFF W. Evidence for the evolution of unpalatability through kin selection in the Heliconiinae (Lepidoptera), 213

BROWN, JAMES H. Mammals on mountaintops; nonequilibrium insular biogeography, 467

BRYANT, EDWIN H. Life-history consequences of natural selection: Cole's result, 75

BULMER, M. G. The effect of selection on genetic variability, 201

BURROWS, PETER M. See CLARK C. COCKERHAM

COCKERHAM, CLARK C., AND PETER M. BURROWS. Populations of interacting autogenous components, 13

CROWE, JOHN H. Anhydrobiosis: an unsolved problem, 563

CROZIER, R. H. Heterozygosity and sex determination in haplodiploidy, 399

DOWNHOWER, JERRY F., AND KENNETH B. ARMITAGE. The yellow-bellied marmot and the evolution of polygamy, 355

DRESSLER, ROBERT L. Dark pollinia in hummingbird-pollinated orchids or do hummingbirds suffer from strabismus?, 80

EBELING, A. W., NEILS B. ATKIN, AND PAULETTE Y. SETZER. Genome sizes of teleostean fishes: increases in some deep-sea species, 549

EHRMAN, LEE. Natural selection for the origin of reproductive isolation, 479

FELSENSTEIN, JOSEPH. On the biological significance of the cost of gene substitution, 1
Erratum, 294

GIBSON, J. B. See J. M. THODAY

GOFF, F. GLENN. See ALLAN N. AUCLAIR

GOULD, STEPHEN JAY. Geometric similarity in allometric growth: a contribution to the problem

of scaling in the evolution of size, 113

GRANT, P. R. Comments on Simberloff's letter, 194

HARDELAND, RUDIGER. Lighting conditions and mating behavior in *Drosophila*, 198

HEED, W. B. See M. P. KAMBYSELLIS

JANZEN, DANIEL H. Escape of juvenile *Dioclea megacarpa* (Leguminosae) vines from predators in a deciduous tropical forest, 97

JERISON, HARRY J. More on why birds and mammals have big brains, 185

JERISON, HARRY J. Quantitative analysis of the evolution of the camelid brain, 227

KAMBYSELLIS, M. P., AND W. B. HEED. Studies of oogenesis in natural populations of Drosophilidae. I. Relations of ovarian development and ecological habitats of the Hawaiian species, 31

KARR, R., AND ROLAND R. ROTH. Vegetation structure and avian diversity in several New World areas, 423

KERSTER, HAROLD W. See DONALD A. LEVIN

KING, CHARLES E., AND WYATT W. ANDERSON. Age-specific selection. II. The interaction between r and K during population growth, 137

KOEHN, RICHARD K., JULIO E. PEREZ, AND ROBERT B. MERRITT. Esterase enzyme function and genetical structure of populations of the freshwater fish, *Notropis stramineus*, 51

KREBS, CHARLES J. See JUDITH H. MYERS.

LEVIN, DONALD A. Plant phenolics: an ecological perspective, 157

LEVIN, DONALD A., AND HAROLD W. KERSTER. Neighborhood structure in plants under diverse reproductive methods, 345

LINDAUER, MARTIN. The functional significance of the honeybee waggle dance, 89

LOMNICKI, ADAM. Animal population regulation by the genetic feedback mechanism: a critique of the theoretical model, 413

MARUYAMA, TAKEO. Speed of gene substitution in a geographically structured population, 253

MERRITT, ROBERT B. See RICHARD K. KOEHN

MERTZ, DAVID B. The mathematical demography of the California condor population, 437

MOYNIHAN, M. Successes and failures of tropical mammals and birds, 371

MYERS, JUDITH H., AND CHARLES J. KREBS. Sex ratios in open and enclosed vole populations: demographic implications, 325

NAIR, PULIYAMPETTA S., AND DANKO BRNCIC. Allelic variations within identical chromosomal inversions, 291

NEI, MASATOSHI. Interspecific gene differences and evolutionary time estimated from electrophoretic data on protein identity, 385

NYBERG, DENNIS. A hypothesis concerning the larger brains of homoiotherms, 183

XUM

PEREZ, JULIO E. See RICHARD K. KOEHN

RAPPORT, DAVID J. An optimization model of food selection, 575

REGNIER, FRED E., JR. See EDWARD O. WILSON

Reports of the Secretary, Treasurer, and Editor of The American Society of Naturalists, 485

ROHLF, JAMES F., AND GARY D. SCHNELL. An investigation of the isolation-by-distance model, 295

ROTH, ROLAND R. See R. KARR

ROTHSTEIN, STEPHEN I. Observation and experiment in the analysis of interactions between brood parasites and their hosts, 71

SCHARLOO, W. Reproductive isolation by disruptive selection: did it occur?, 83

SCHNELL, GARY D. See F. JAMES ROHLF

SETZER, PAULETTE Y. See A. W. EBELING

SIMBERLOFF, DANIEL. Population sizes of congeneric bird species on islands, 190

THODAY, J. M., AND J. B. GIBSON. Reply to Scharloo, 86

TOPOFF, HOWARD. Polymorphism in army ants related to division of labor and colony cyclic behavior, 529

TULLOCK, GORDON. The coal tit as a careful shopper, 77

TURNER, JOHN R. G. Wright's adaptive surface, and some general rules for equilibria in complex polymorphisms, 267

WILSON, EDWARD O., AND FRED E. REGNIER, JR. The evolution of the alarm-defense system in the formicine ants, 279

WOLFF, GEORGE L. Genetic modification of homeostatic regulation in the mouse, 241
